- 3.8 Welfare Facilities
- 3.9 Personal Protective Equipment
- 3.10 Permit to Work Systems

PART 4 Hazard Identification and Control Measures

- 4.1 Risk Assessment Matrix

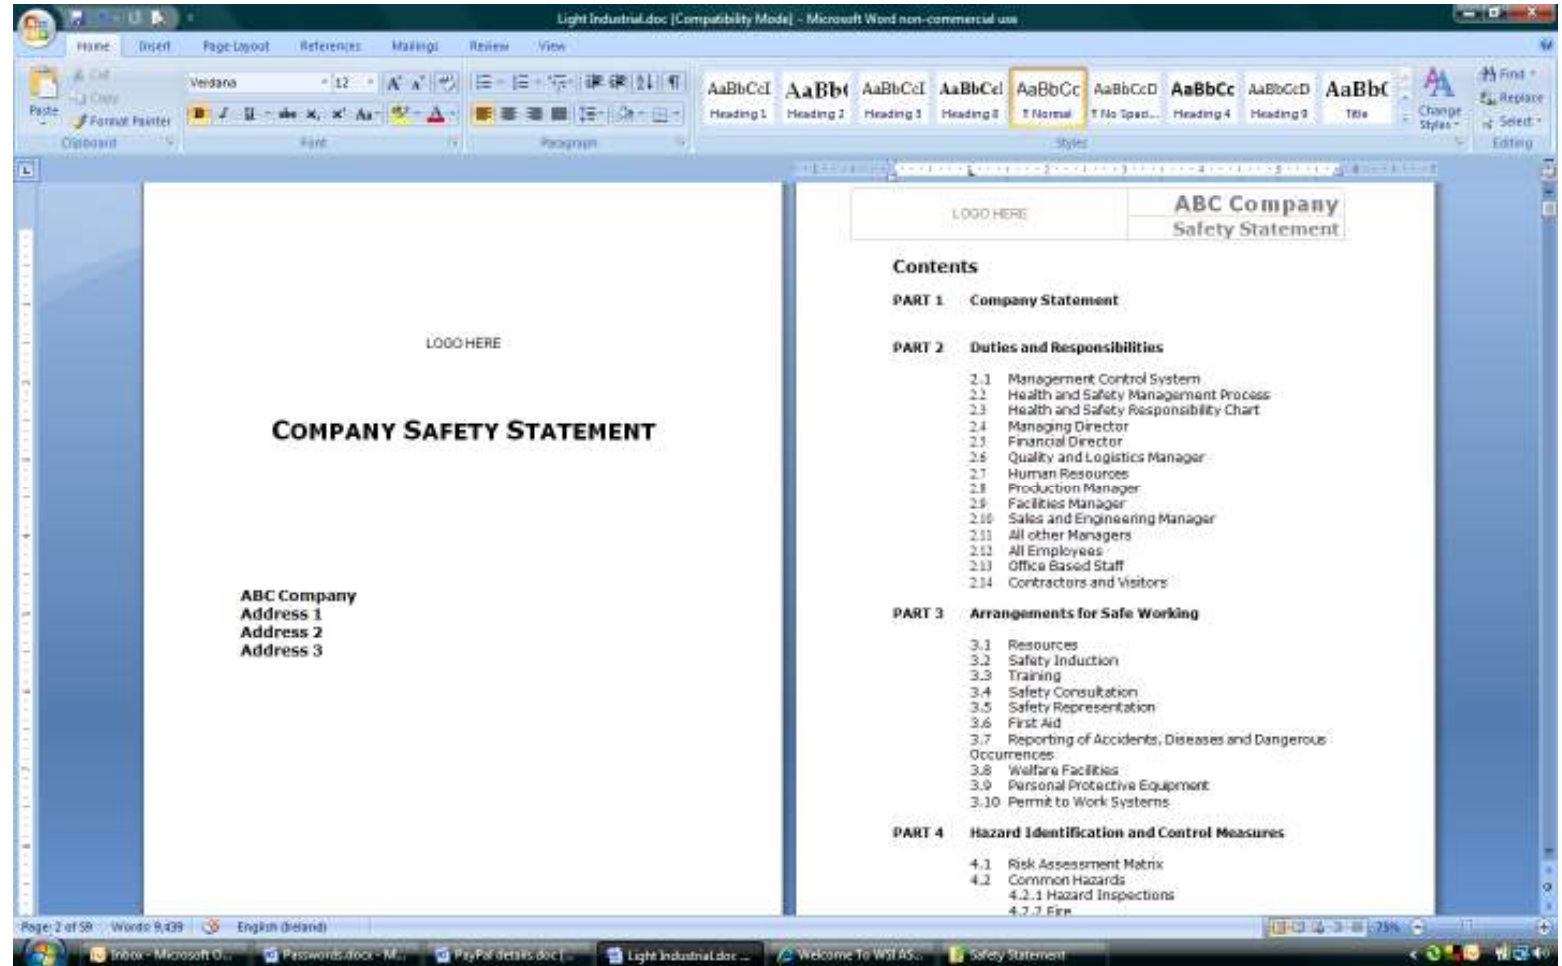

- 4.2 Common Hazards
- 4.3 Hazard Inspections
- 4.4 Fire
- 4.5 Access and Egress
- 4.6 Housekeeping
- 4.7 Manual Handling
- 4.8 Electricity
- 4.9 Offices
- 4.10 Visual Display Units
- 4.11 Hazardous Substances
- 4.12 Working at heights and ladders
- 4.13 Working in store
- 4.14 Pallet trucks
- 4.15 Cooked food preparation
- 4.16 Cash handling
- 4.17 Pallets
- 4.18 Using the compactor
- 4.19 General Machine hazards
- 4.20 Storage and falling stock
- 4.21 Food prep and knives
- 4.22 Bullying and Stress
- 4.23 General shop hazards
- 4.24 Floor washer
- 4.25 Home deliveries
- 4.26 Bottled gas

PART 5 Managing Director's Annual Report

1. Opening the document.

When you first open your new Template, the contents pages will be similar to this image.

The screen shot here is of Microsoft Office 2007. The image will appear different if you are using 2003. However, the content is identical and the process for editing is the same.

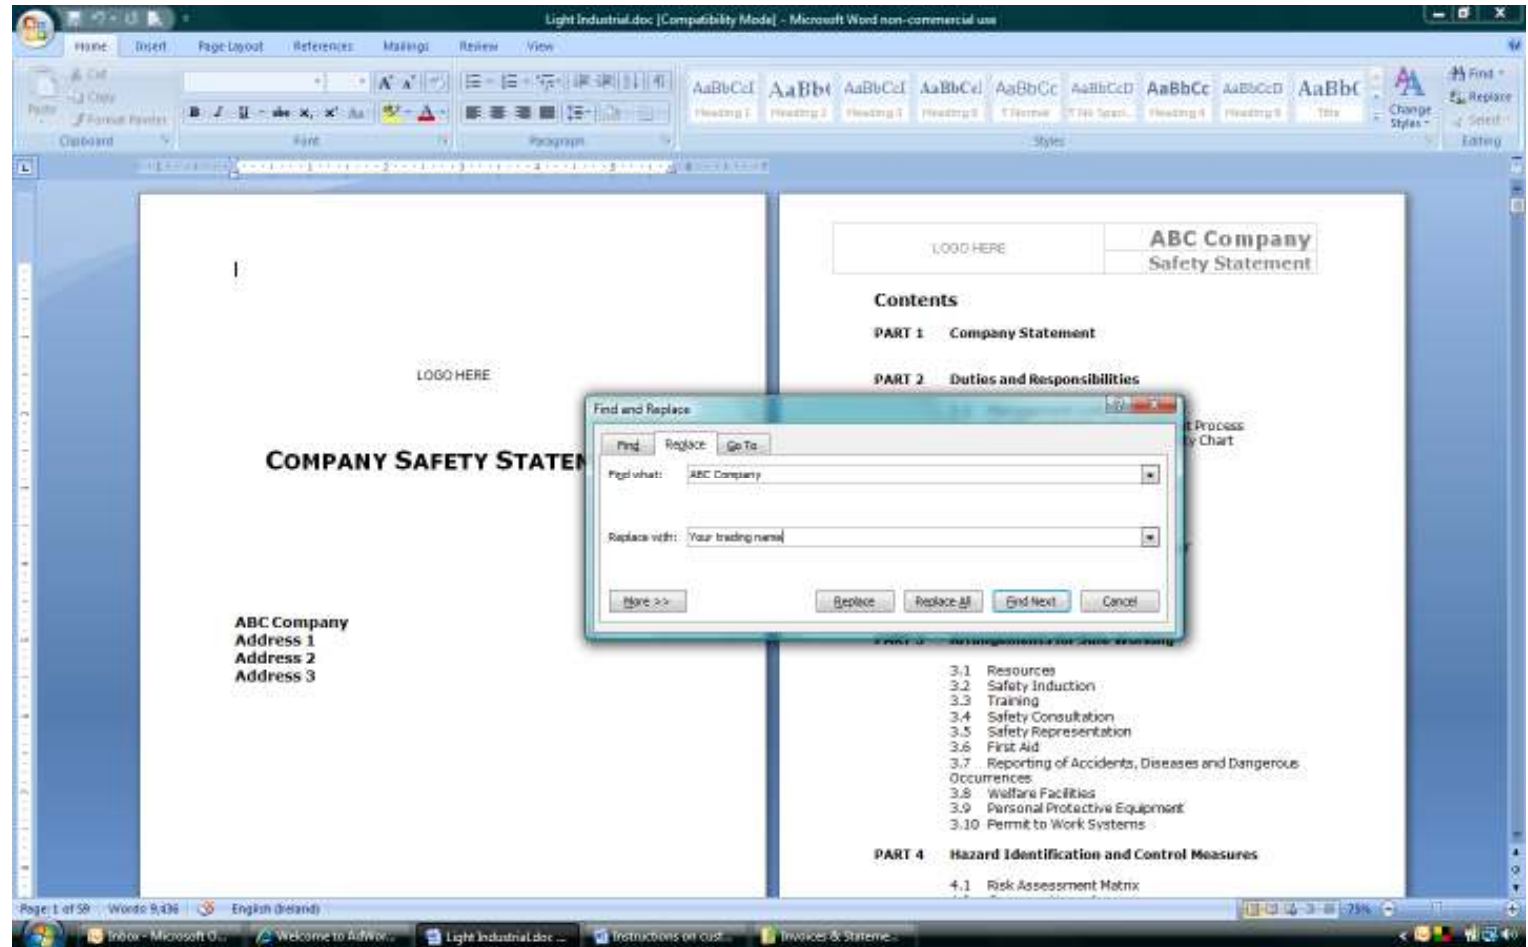

2. Adding the Company ID

Your first task is to enter your company or trading name. Using the “Edit” option in Word, select the option to “find and replace”.

On the line “Find What” type in ABC Company

Now on the line “Replace with” type in your company name or trading name. Then press the button “Replace All. This action will enter your company name everywhere it is needed in the Template.

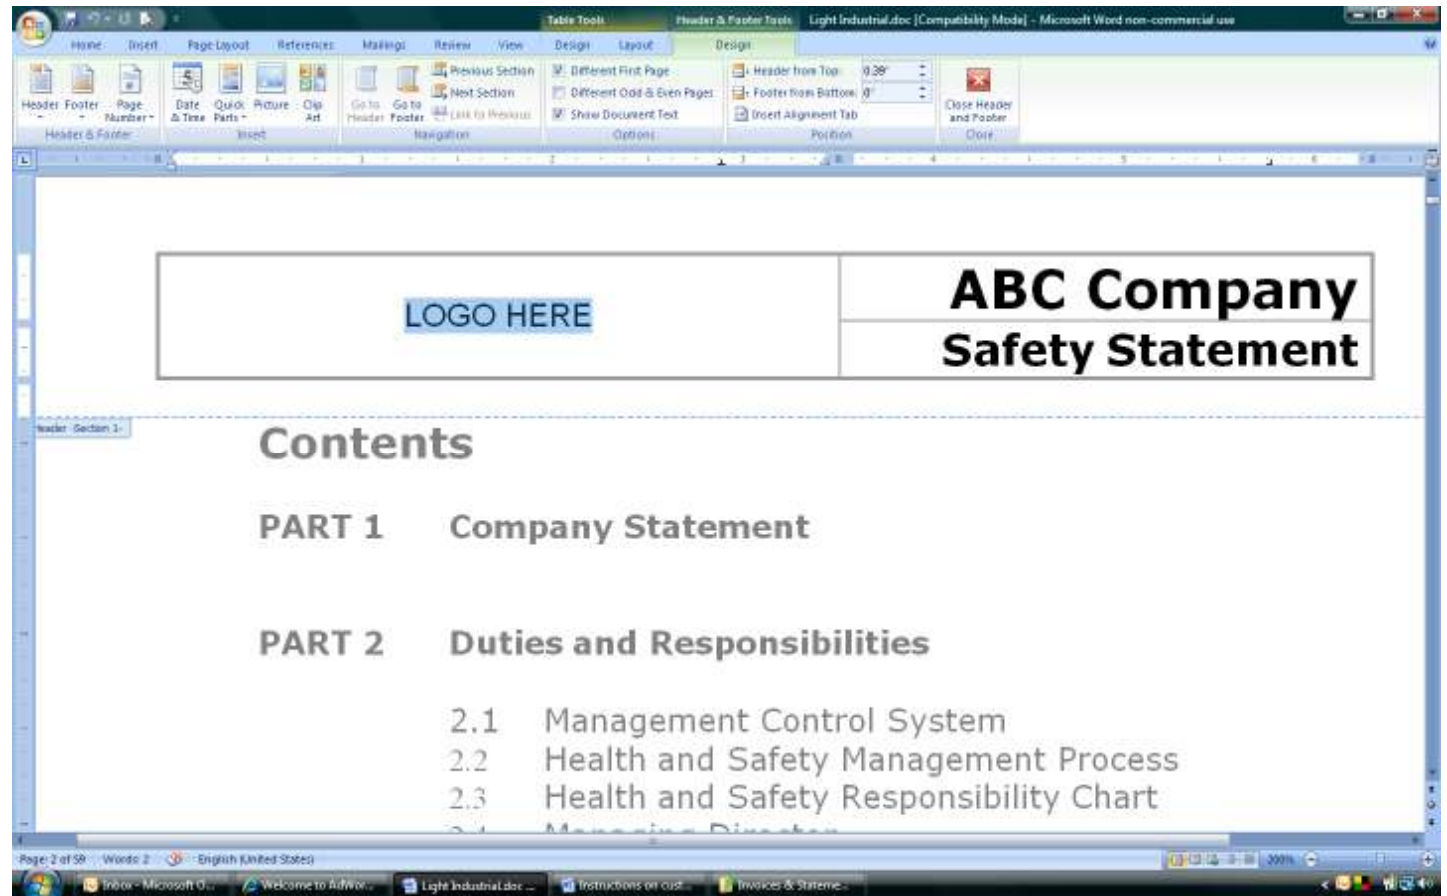

3. Adding Logos

If you have a company logo you can also use it at this point. On the first page of the Safety Statement delete the words LOGO HERE and insert your logo in the space. If you do not have a logo then simply delete the wording.

If you do have a company logo it is a good idea to have it in the header of each page as this gives a more customised feel to the document.

If you wish to place your logo on the header of each page simply double click on the header box to open it. Then highlight the text LOGO HERE and replace it with your logo. You will need to adjust the size of the logo to fit in the box. If you do not have a logo simply delete the text as before. To return to the document simply double click on the middle of the page or select close Header and Footer from the options.

4. Entering issue date and Manager names

The next task is to change the date of the document issue. This is shown in the Footer of the document along with the names of the Managers responsible for safety.

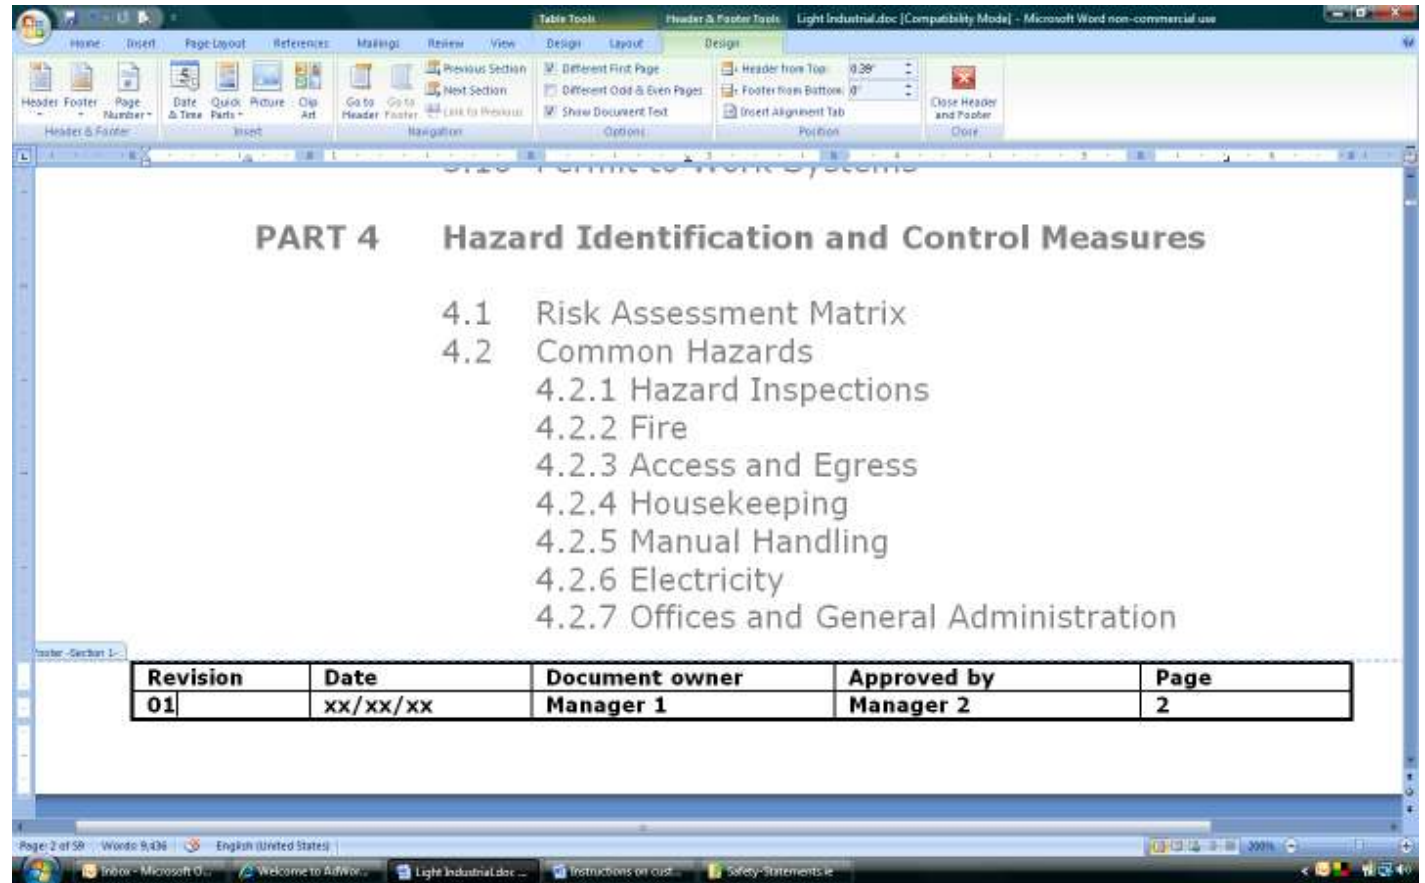

Change the date in the same way that you changed the company name. Replace xx/xx/xx with the date that you are making your edits or the date you want the Safety Statement to be active from.

You then need to enter the names of the Managers or employees who will look after safety.

Manager 1 should be replaced with the name of the Manager or employee who will deal with day to day safety issues.

Manager 2 should be replaced with the name of the most senior manager or director who has responsibility for ensuring the company adheres to good safety policies and also provides the resources such as budgets necessary to deliver on the policy. In a small company or for a self employed person it is OK for Manager 1 and Manager 2 to be the same person.

At this stage you will have set up the company name, issue date of the safety statement and names of relevant managers throughout the entire document. The next step is to enter your address details and brief description of company activities in the indicated areas. This is simply a matter of typing in the information. You should now also review the details of the policy, the commitment to safety and the structures in section 2 of the Template. You are free to edit the content if you wish in order to ensure it matches your activities.

6. Risk Assessment

This is the most important part of the Safety Statement. Depending on which Template you have purchased, there will be a list of Pro-Forma risk assessments in section 4. This list will have been tailored to suit the usual hazards associated with the Industry or Occupation that was chosen. You are also free to add new assessments over time.

Section 4 starts with a Risk Assessment Matrix. It is a simple table that uses a score of between 1-7, for how likely an injury would be to occur and a score of 1-6, for how severe the injury. When you decide on a value for each one, you multiply the values to get a Risk score. For example, using a circular saw may have an injury likelihood of 4 and an injury severity of 5, this would result in a risk score of 20. Placing it in the medium to high risk category.

The screenshot shows a Microsoft Word document titled "Light Industrial.doc [Compatibility Mode] - Microsoft Word non-commercial use". The document content includes:

- A placeholder for a logo: "LOGO HERE".
- The company name and title: "ABC Company Safety Statement".
- The section heading: "4.1 Risk Assessment Matrix".
- Text explaining that the list on the following page are task based and machine assessments that are held separate to the Safety Statement.
- A formula to be used for conducting risk assessments, assessing the risk from observed infringements/hazards or after an Audit.
- Text explaining how to calculate the risk value using the formula below and enter the result on the risk assessment sheet. This formula is taken from the SHE database Health and safety Management system. All risk assessments are monitored and tracked using this system.
- A Risk Assessment Matrix table:

		How likely is an injury								
		1	2	3	4	5	6	7		
How serious will the injury be	1									
	2									
	3									
	4									
	5									
	6									

- Notes:
- Hazards.** Things that can cause an injury.

The status bar at the bottom indicates "Page: 35 of 50", "Words: 9,422", and "English (Ireland)".

Follow the instructions in Section 4.1 on how to use the matrix. You will be required to give a score of between 1 and 42 to each assessment in the Template.

Shown here is one example of the top portion of the risk assessment. They all start off with some general explanation points and then have the table to enter your scores.

As you go through each of the assessments in the Template, try to give as honest a score as possible. Ideally 2-3 people should do this together and one of those people should be a person who actually does the job.

Once you have entered your score, read through the control measures and edit them if you need to.

ABC Company Safety Statement

4.2.13 FORKLIFT TRUCKS AND GENERAL MHE.

It is the supervisors/managers responsibility to ensure that no employee uses a forklift truck, unless they have been properly validated by the Company. Failure to comply with this instruction is a serious offence.

Likelihood	Severity	Risk Value
Score –	Score –	Result –

HAZARDS

- A truck colliding with object/structure causing collapse of same.
- Jumping from a truck while still in motion.
- Excess speeding in confined areas, restricted aisle-ways etc.
- Lack of attention can result in any of the following:
 - Overturning.
 - Persons being run over/struck by fork lift truck.
 - Material falling from forks.
 - A truck colliding with an object.

RISK ASSESSMENT High

CONTROL MEASURES

- Whenever practicable, internal transport and pedestrians will be segregated, by the provision of pedestrian doors at main access points and clearly delineated pedestrian access routes
- All fork lift trucks are fitted with:
 - Forward flashing warning light(s) interlocked with the

7. Annual Review

Each year the Managing Director or most senior functional manager is required to complete a report highlighting the Safety Achievements during the year. At the back of the Safety Statement there is a facility to do this. At your financial year end, simply complete the form. Feel free to add to this if necessary.

The image shows a Microsoft Word document titled "Light Industrial.doc [Compatibility Mode] - Microsoft Word non-commercial use". The document is a form for an "ABC Company Safety Statement". The form includes a header with a "LOGO HERE" placeholder and the company name. The main content is divided into three sections: "SAFETY STATEMENT", "SAFETY TRAINING:", and "NEW SAFETY ARRANGEMENTS". Each section contains a brief description and a list of items with checkboxes.

ABC Company
Safety Statement

SAFETY STATEMENT

The following is a report of progress with our Health and Safety Policy as required by Section 12(6) of the Safety Health and Welfare at Work Act 2005.

SAFETY TRAINING:

During the year, the following safety training courses were run:

1.
2.
3.
4.
5.

External safety and health courses attended by our staff included:

1.
2.
3.

NEW SAFETY ARRANGEMENTS

The following new safety arrangements were put in place during the year:

1.
2.
3.
4.
5.
6.
7.

Page: 57 of 58 Words: 9,462 English (Ireland)

8. Staff Sign Off

Once you have completed your amendments you need to bring the Safety Statement to the attention of Staff. Make the Safety Statement available in an area such as a canteen and allow them an agreed amount of time to peruse it. Once they have done this get them to sign the declaration in Part 6.
